

*making sure caregivers
are always there*

We are NOT a staffing agency — we are the only supplemental staffing program that is a preferred partner through your state hospital association.

Healthcare Staffing Services will become your liaison and help you keep virtually every clinical and non-clinical department staffed through a simple standardized approach while being overseen by experienced staff.

We have been dedicated since 2002 to helping our member hospitals have the most experienced, talented and best caregivers at the bedside to provide quality patient care. Our services can be customized to meet your individual needs — all at no cost to you!
