RISK MANAGEMENT

*presents*

# *Active Shooter: Prevention, Response and Recovery*

A Program for Quality, Risk, Facility Managers  
and Emergency Preparedness Personnel

Friday, June 2, 2023

*Oklahoma Hospital Association  
Oklahoma City*

## Overview

Violence has a tremendous impact in the workplace. According to the Bureau of Labor Statistics, 16% of all workplace fatalities result from violence. The FBI identified 434 active shooter incidents involving 444 shooters in the United States that occurred between 2000 and 2021. Of those, 16 incidents occurred in a health care environment, resulting in 67 casualties. While the incident will be over in minutes, there are steps organizations can take to better prepare for these scenarios to help reduce the chance of occurrence, minimize the number of casualties and manage the impact. This dynamic environment and its potential for violent disruption has hospital leadership searching for solutions that will protect their staff and patients.

## Learning Concepts:

- Discuss the progression of preparatory activities along a pathway to violence.
- Examine the various warning signs an individual may exhibit during the planning phase.
- Explore effective response techniques in an active threat to ensure the safety of patients, staff, and visitors.
- Understand how a facility can maintain critical operations during an extended response to an active threat.
- Identify successful physical and organizational measures to influence aggressor actions.
- Learn how to facilitate coordination and communication with community partners during an active threat.

### Agenda

**8:15 a.m.**  
Registration

**9 a.m.**  
*Active Shooter Prevention and Response*

**10:30 a.m.**
